

Profile Summary

Data engineering and analytics professional with practical experience in Azure Databricks, Azure Data Factory, Power BI, and SQL-based reporting. Adept at designing clean data pipelines, developing business dashboards, and supporting data-driven decision-making through accurate, scalable solutions.

Technical Skills

- **SQL & Databases:** MySQL, Microsoft SQL Server, BigQuery.
- **Python & Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.
- **BI & Visualization:** Power BI, DAX, Tableau, Excel, dimensional modeling.
- **ETL & Data Engineering:** Azure Data Factory, Azure Databricks, Delta Lake, Medallion Architecture, Power Query, Fabric Notebooks.
- **Cloud & Big Data:** PySpark, Apache Kafka, Snowflake, Azure Data Platform.
- **Core Competencies:** Data Cleaning, Data Modeling, KPI Tracking, Statistical Analysis, Pipeline Orchestration.

Experience

Data Engineering Intern

Feb 2026 – April 2026

CloudServ Systems India Private Limited

- Debugged and refined ETL pipeline logic across Bronze–Silver–Gold layers using Azure Data Factory and Databricks, improving extraction accuracy for 5+ business-critical reporting workflows and reducing manual reporting issues.
- Built 3+ Power BI dashboards on Gold-layer CRM data using DAX measures and dimensional models, enabling stakeholders to monitor business performance through cleaner, faster reporting.

Projects

Telecom Customer Churn Analysis & Prediction

[GitHub](#) | [Live Demo](#)

Tech Stack: Power BI, Python (Scikit-learn, Pandas, NumPy), DAX

- Analyzed 6,418 customer records to identify churn trends, revealing a 27% churn rate influenced by contract type, service usage, and geography.
- Identified high-risk segments such as month-to-month users (46.5% churn) and Fiber Optic customers (41.1%), helping support targeted retention strategies.

Car Sales Dashboard Analysis

[GitHub](#) | [Live Demo](#)

Tech Stack: Power BI, DAX, Excel

- Evaluated \$371.2M in sales data from 13,300+ transactions to identify regional and product trends.
- Consolidated 5+ metrics, including YTD/MTD sales, average price, and YoY growth, into a unified dashboard.

E-Commerce Analytics Pipeline on Databricks

[GitHub](#)

Tech Stack: Azure Databricks, Delta Lake, PySpark, Power BI

- Processed 100K+ raw e-commerce records in Databricks using Delta Lake and Bronze–Silver–Gold architecture, preparing data for downstream analytics.
- Performed analytical reporting on top of the Gold layer — built Power BI dashboards tracking order status trends, customer segmentation, and revenue aggregation across product categories.

Education

Parul University, Vadodara, Gujarat

B.Tech – Computer Science (Artificial Intelligence)

CGPA: 7.54

2022 – 2026

Certifications

- Databricks Accredited AI Agent Fundamentals – [View Certificate](#)
- Database and SQL – [View Certificate](#)
